### PROFESSIONAL EXPERIENCE

#### MERN FULL STACK DEVELOPER

##### PROJECT

Laptop Service Center is a web-based application designed to streamline the process of managing laptop repair and maintenance services. It allows customers to easily book repair requests, track service progress, and communicate with technicians. On the admin side, the system helps manage service records, inventory, customer details, and technician assignments efficiently.

- Online Service Booking – Customers can request laptop repairs by submitting issue details and contact information.
  - Service Tracking – Real-time status updates for each repair (e.g., Pending, In Progress, Completed).
  - Customer Dashboard – View repair history, invoices, and track active service requests.
- 

### EDUCATION

#### MAHATMA GANDHI UNIVERSITY 2019–2022

Bachelor of Science in Physics Applied Electronics

- Best Thesis Awardee
- Recognition for Extended Research Paper

### Experience

- Internship in MERN Stack Development from Luminar Technolab Kakkanad, Ernakulam
